

CRANE TRAINING USA

OPERATOR TRAINING

Crane Training USA provides Overhead Hoist and Crane Operator Training, designed to meet code requirements and expand your employees' knowledge.

Who should attend?

- Overhead Hoist and Crane Operators
- All Supervisors
- All Safety Department Personnel
- Production and Plant Managers
- Purchasing Department Personnel
- Plant Engineering Personnel

Course session includes:

- Classroom Training
- 150-page Training Manuals Covering Hoists, Cranes, Slings and Below-the-Hook Devices
- Evaluation of 100+ Sample Parts
- Question and Answer Periods
- Written Testing
- Certification Certificates, Cards, and Decals
- Hands-On Training - (Time Permitting)

What will be learned?

- Proper Terminology
- Injury Statistics Which Enforce the Importance of Training
- Responsibilities of Operators
- OSHA Daily Inspection Requirements for Hoists, Cranes, Slings, and Below-the-Hook Devices
- Proper Inspection Methods
- Inspection Guidelines - To Ensure OSHA Compliance
- Proper Safe Use of Hoists, Cranes, Slings and Below-the-Hook Devices

Can your personnel answer these questions?

- How big is the primary danger zone?
- What does one cubic foot of steel weigh?
- What is the tension on a sling leg when the sling to load angle is 30 degrees?
- Who should inspect?
- What is resultant sling angle?
- What factor is used to derate an eyebolt, when the eyebolt is being used horizontally?
- What is the defined purpose of the hoist hook safety latch?
- What is the grade of a chain sling and how can you tell if it is that grade?

Course Length

One or two - 8 to 10 hour days
Depending on equipment used
and number of attendees
